

# ROBERT SHELTON, CSM

## Developer & Systems Engineer

@ robes98@vt.edu    434-882-0740    github.com/rbs333

## EXPERIENCE

### Software Intern

#### Lightbulb Machine

📅 Jun 2018 – Sep 2019    📍 Charlottesville, Virginia

- 40 hours a week of React and Meteor experience across 4 different projects.
- Added credit card functionality to web platform receiving and distributing funds for/to non-profits.
- Created a methodology for testing OCR software which utilized custom JavaScript to statistically evaluate translation accuracy of typed and hand-written text.
- Performed competitive landscape analysis for two new product offerings consisting of a SAAS application and a data centered app to aid philanthropic investment.

### Inventory Manager

#### Micah's Backpack

📅 Sep 2017 – Present    📍 Blacksburg, Virginia

- Responsible for \$3000 worth of weekly inventory purchases.
- Lead coordinator between suppliers and volunteers to assure quantity and quality of meal output.
- Developed user friendly Google Sheet to automate the collection of performance statistics and make daily usage faster and more accurate.
- Standardized practices through development of SOPs for next generation contributors.

### Software Intern

#### Excella Consulting

📅 Jan 2017 – Present    📍 Blacksburg, Virginia

- Created academic website based on REST API pattern and SOLID principles with Angular 6, ASP.NET Core, Entity Framework, and PostgreSQL.
- Dockerized Node.js server and Ionic client to Heroku production environment and assisted onboarding new team members through virtual machine and Git environment setup on hybrid mobile app.
- Completed Certified Scrum Master (CSM) training.

## RESEARCH

### Sustainable Biomass Feedstock Logistics

- Created and educated team members in software architecture for web-based decision support tool integrating communicative Gurobi and Simpy optimization algorithms to a Vue.js frontend via REST API.
- Promoted the creation of tangible project deliverables following the principle of vertical slices of functionality and lead the design process for first generation user interface.

## EDUCATION

### B.S. Industrial Systems Engineering

Virginia Tech | GPA: 3.73

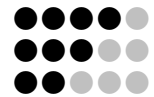

📅 Aug 2016 – May 2020

## CODING

Git, Angular, React, Vue.js

Python, Julia, SQL, MongoDB

C#, .NET, Docker

## EXTRACURRICULAR

### Data Science for Social Good Workshop

- Interviewed experts in mechanism design and created video content to educate others.
- Expanded network and attended lectures addressing health care, global power infrastructure, auction algorithms etc.

### Open Source Dev Conference

- Presented on time management and the pomodoro technique.
- Invited afterward to re-give talk to Radford University computer science club.

### 100 Girls of Code

- Instructed camp members in HTML and CSS.
- Inspired students to embrace a positive can-do attitude.

### Hot Cakes Hot Takes Podcast

- Host and co-creator of student run podcast.
- Twenty episodes to date ranging in content from interviews with Hip Hop artists to discussions on behavioral economics.

### Residential Leadership Community

- Lead NRV train project with the Blacksburg Partnership.
- Created student documentary to promote extended train lines to Blacksburg area.

## MUSIC

### Virginia Boy

- Original full length studio album released to Spotify and CD.
- Organized recording schedule among team of musicians, producers, and engineers.

### Key Performances/Features

- In The Neighborhood Sessions | TNT Network
- VT SoundFest 2018, 2019
